

# Respina Anti-freeze AF

Extended life Anti-freeze/Coolant

## Description

Respina Anti-freeze AF is an ethylene glycol-based anti-freeze containing suitable additives that is recommended for use in the gasoline and diesel vehicles and also industrial cooling systems.

## Specification and Approvals:

- ASTM D3306
- SAE J1034

## Advantages & Benefits

- Protects all cooling system components against corrosion and rust
- Raising the boiling point of the coolant
- Free from nitrates, amines and phosphates to be environmentally friendly
- Excellent chemical stability

## Typical Data

Property	AF	Test method
Density at 15 °C (kg/m <sup>3</sup> )	1115	ASTM D4052
Color	Green / Red	-
pH (50% vol in water)	7.5	ASTM D1287
Freezing Point (50% vol in water)	-37	ASTM D1177
Boiling Point (50% vol in water)	+109	ASTM D1120
Reserve Alkalinity (ml)	17 ~ 21	ASTM D1121

❖ Respina Anti-freeze AF is formulated and produced in RESPINA LUBRICANTS blending site and presented data is based on standard tests under laboratory conditions and is given as a guide only.
